

weeds of national significance

Lantana

Next time you're weeding the garden, please remove me!

Free Australia **from** the weed **Lantana**

What you can do

- Remove all lantana plants from your garden.
- Don't dump lantana waste in bushland as it easily takes root. Put it into a black bag and bin it.
- Use safe alternate species—your local council and nursery can provide advice.

Impacts of ornamental lantana

- Ornamental varieties can escape into bushland.
- Spread is increased by seeding.
- Invades native areas forming dense thickets and smothering vegetation.
